honourable mention 2012

## Compact forklift with proven AC technology

Maximum performance

Spacious operator's cab

Fingertip controlled mini levers available (optional)

Weight indicator (optional)

Safety system that prevents over loading (optional)

Battery side loading system available

Wet brakes standard

■ Some of the photos may include optional equipment.

# High Efficiency & Optimal Performance

Efficient, smooth running and compact design provide you with enhanced performance and highest productivity.

**10/13/15BTR-9**

## More efficient operating control levers

Electronic directional control and secondary horn are mounted to the hydraulic lift lever for quick and precise maneuvering.

■ Some of the photos may include optional equipment.

## Curve control

Curve Control limits travel speed based on turning radius, reducing speed for a smooth, precise turning operation for the driver.

## Designed for compact aisle width and turning radius

The combination of 3-wheel design and rear wheel drive offers central pivot turning. This allows the driver to work in very confined spaces.

■ Some of the photos may include optional equipment.

## Advanced drive and lift performance with proven durability and low maintenance

The enclosed drive and pump motor with AC technology combine power, high maintenance intervals and excellent durability. The ZF transmission converts the drive engine's power to any direction the driver requires.

### Travel Speed (MAX)

## Anti roll back system, travel speed and gradeability

Anti Roll-back system offers protection against the machine rolling back on a ramp in combination with exceptional ramp start capabilities.

# Advanced Safety

The safely designed driver's space makes your operating more comfortable.

**10/13/15BTR-9**

■ Some of the photos may include optional equipment.

## Excellent visibility for safe operation

Optimized lift cylinder arrangement provides operator with wider visibility. The panoramic mirror expands the driver's view when backing up.

## Strong overhead guard

Exceeding CEE and ANSI regulations, the overhead guard offers great protection combined with excellent all round visibility

## Fork safety features

When the forks are being lowered, a down-control valve maintains the controlled speed. The down-safety valve prevents forks from dropping down in case of sudden damage of hydraulic line.

## OPSS (Operator Presence Sensing System)

When the operator is not in the seat all mast and drive movements are impossible.

**Lift Lock** **Tilt Lock** **Drive Lock**

■ Some of the photos may include optional equipment.

## Safety lamps & rear reflectors

Halogen headlights and rear LED combination lights offer the driver visibility in all circumstances. Rear reflectors mounted on the counterweight enhance safety for the driver and the application.

# Optimised Ergonomics & Fast and Easy Maintenance

An ideal arrangement of components ensures easy access and convenience for maintenance.

**10/13/15BTR-9**

■ Some of the photos may include optional equipment.

### Grammer seat (Option)

An easily adjustable suspension seat, based on a human engineering design, provides greater comfort reducing operator fatigue.

### Spacious operator cabin

The BTR is designed as a small, compact design, yet the operator compartment has ample room for virtually any operator.

### Advanced LCD Monitor

Some of the photos may include optional equipment.

The LCD color monitor with 3.5 inch graphic smart display allows the operator to easily and efficiently control the machine. The monitor provides information about speed & accelerator lever, steer angle & travel direction, battery discharge indicator, hour meter & working mode. The optional load indicator displays the load weight in the monitor. The operator can select various performance modes to meet all working conditions. It is available multi-languages (maximum 11) for operator.

**H (High) mode N (Normal) mode E (Economic) mode Turtle mode**

### Low entrance height

In order to get in and out of the cabine in an easy and safe way the height of the entrance step is only 400mm high.

### Adjustable steering wheel

To achieve a comfortable drive position, the angle of the steering column can easily be adjusted through a lever on the right-hand side of the steering column.

### Optimized pedal position and floor mat

The position of accelerator and throttle have been optimized through human engineering.

### Easy battery replacement

The battery compartment is equipped with a side battery removal assembly for easy removal and replacement.

### Brake oil reservoir with level sensor

The enhanced brake oil reservoir, located in the upper left dash is equipped with an electronic level sensor and easily visible through the monitor.
